AN ABSTRACT OF THE
"REFERENCE BOOK OF STANDARD LETTER SYMBOLS"

Compiled by Prof M. M. Izhevskiy,
 Eng S. I. Korshunov, and
 Eng N. K. Parfenov.

This book includes only terms (or phrases) with letter symbols found in the standard specifications for symbols and units of measurement in force on 1 October 1945. Rules for writing subscripts and superscripts, as recently determined by the Committee of Technical Terminology, Academy of Sciences, USSR, are given.

In Part I, for convenience, phrases appear under the principal noun; thus: "coefficient of viscosity, dynamic." The second and third columns contain usual and alternate symbols; the fourth, explanations; the fifth and sixth, GOST numbers and abbreviated title.

Part II gives symbols in the order of Latin, Greek and Russian letters and special provisional symbols.

The first section of Part III includes arithmetical and geometrical symbols, trigonometric functions, etc. The second section gives GOST numbers in the first column, with ordinary and abbreviated nomenclature in the two following columns.
